SYMBOLS

Standard notations are used throughout this publication, with meanings as follows:—

n.a.	Not available.
n.y.a.	Not yet available.
r	Revised.
p	Preliminary or subject to revision.
...	Nil, or less than half the final digit shown.
—	Where drawn across a column between two consecutive figures, indicates break in continuity of series.

ROUNDING OF FIGURES

Where figures in this publication have been rounded, any discrepancies between the totals shown and the sums of the component items are due to rounding.

SYDNEY STATISTICAL DIVISION

The Sydney Statistical Division, as defined for general statistical purposes, embraces the area in close economic and social contact with Sydney. It replaces the Metropolis of Sydney and the Division of Cumberland as delineated before 30th June, 1966. The new division comprises the former Cumberland Division, that part of Camden Municipality formerly included in the South Coast Division, and part of the City of Blue Mountains (formerly in the Central Tableland Division).

STATISTICAL DISTRICTS

Newcastle Statistical District (within the Hunter and Manning Division) and Wollongong Statistical District (within the South Coast Division), as defined for general statistical purposes, embrace the area in close economic and social contact with the main city. Newcastle Statistical District comprises the Cities of Newcastle and Maitland, part of the City of Greater Cessnock, and the Shires of Lake Macquarie and Port Stephens. Wollongong Statistical District comprises the City of Greater Wollongong and the Municipalities of Kiama and Shellharbour. These new Statistical Districts were adopted in June, 1966.

2. Wage and Salary Earners in Civilian Employment in N.S.W.: Government and Private

(Excluding employees in rural industry, employees in private domestic service, and Defence Forces)

Notes:—

- The current series of employment statistics is based on benchmark data derived from the 1954 and 1961 censuses of population. For periods between and since the censuses, the estimates are derived from:—
 - monthly returns supplied by employers for purposes of Commonwealth pay-roll taxation;
 - monthly returns from governmental authorities;
 - some other direct records of monthly employment (e.g. hospitals); and
 - estimates of changes in the number of employees outside the scope of the previous sources.
- Employees in rural industry and in private domestic service, and members of the full-time Defence Forces (including, from July, 1965, national servicemen), are excluded from the scope of the series.
- The series is designed to measure the *current monthly trends* in the defined fields. The estimates are compiled on an establishment or enterprise basis, and the benchmark data (which have been derived from industry tabulations compiled on the occasion of the population censuses from schedules provided by individuals) have been adjusted as nearly as possible to this basis.
- A new series of employment statistics for June, 1966, and subsequent months, based on benchmark data derived from the 1966 population census, will be developed in due course. In the 1966 population census, new work force definitions were adopted—as a result, some persons who would not have described themselves as being in employment at previous censuses (e.g. married women in part-time employment at the time of the census) were brought within the scope of the work force. The new employment series will accordingly be at a higher level than the current series.

* Total earnings divided by total civilian employment expressed in male units. "Earnings" includes salaries, wages at award rates, overtime, over-award and bonus payments, commissions, etc., but excludes payments to members of the Defence Forces. "Male units" represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings.

† Includes Australian Capital Territory.

Note. Comparisons as to trend should be made for complete years or corresponding quarters, as the quarters are affected by seasonal influences.

* Relates to industrial disputes involving a stoppage of work for a minimum of 10 mandays. The figures include the time lost by employees who worked in establishments where stoppages occurred but were not themselves parties to the disputes; they exclude the time lost, as a result of the disputes, by employees in other establishments.

9. Population, Migration, Births, Deaths, and Marriages, New South Wales

- Notes:— 1. The estimates of the population for periods between the 1961 and 1966 censuses of population and since the 1966 census have been prepared by adding to the population ascertained at the previous census the subsequent natural increase and estimated net migration. The estimated net migration component has been based on statistics of overseas migration by State of residence and estimates of interstate transfers of residence, with no allowance for holiday, business, or other similar short-term movements interstate. The population estimates have been revised in the light of the final 1966 census results. Statistics of population and migration have been rounded to the nearest hundred.
2. Full-blood aborigines have been included in population estimates from 30th September, 1966, and in statistics of births and deaths from 1st January, 1967. (Marriages of aborigines are included in all periods.) Differences between population estimates including aborigines and those purporting to exclude them should not be taken as a reliable measure of the number of full-blood aborigines.

(a) Excludes Albury (regarded as a Victorian selling centre). Weighted average, year ended June.

(b) Average return f.o.r. country rail siding, allowing for cost of bags and including governmental assistance to wheatgrowers. Pool season, generally year ended October.

(c) Basic selling prices of Australian Wheat Board for f.a.q. bulk wheat, f.o.b. Sydney. These quotations are more or less nominal, with sales being made above and below the basic price from time to time; for some destinations, where other exporting countries have a geographical freight advantage, actual selling prices are lower than the basic price. Annual quotations are the average of the twelve monthly prices, year ended July.

(d) Price charged by Australian Wheat Board for bulk wheat for flour for local consumption, f.o.r. Sydney. Annual quotations are the average of the twelve monthly prices, year ended November.

(e) Weighted average price (per pound of commercial butter) paid for cream supplied to N.S.W. factories, inclusive of Government subsidy, year ended June.

(f) Weighted average price for choicest butter, f.o.b. Australia. Annual quotations are for year ended June.

(g) Price for choicest quality bulk butter supplied in 56 lb. boxes, delivered (including price of box). Annual quotations are the average of the twelve monthly prices, year ended June.

BUILDING ACTIVITY IN NEW SOUTH WALES

Notes:— 1. Building is classified as *private* or *government* according to ownership.

2. Figures of *building approved* have been compiled from (a) permits issued by local government authorities to build in that part of the State (covering all municipalities and the larger residential areas within shires) subject to building control by local authorities, and (b) contracts let or work commenced and day labour projects authorized by governmental authorities. Some building in rural areas is excluded.

3. The value of *building jobs approved* represents the estimated value of the whole job when completed, excluding the value of the land on which the job is carried out.

* Includes government-owned vehicles other than those of the Defence Services, but excludes tractors, trailers, caravans, and mobile plant and equipment.

† This series is based on the 1955 and 1962 Censuses of Motor Vehicles and the records of State and Commonwealth registration authorities, and involves a type classification which is standard for all Australian States. The series differs from the former series (compiled by the Department of Motor Transport), primarily because of differences in the classification of vehicles and in the method of treating cancellations of registrations.

* Averages of weekly figures.

† Excludes inter-bank deposits (mainly deposits of savings banks with trading banks) and Government deposits.
 ‡ Net gold and foreign exchange holdings by official and banking institutions. June figures relate to end of month; figures for other months are for the last Wednesday in the month. As a result of the devaluation of the pound sterling and the New Zealand dollar in November, 1967, the Australian dollar value of holdings of these currencies was reduced by approximately \$A113 million.

* Weighted average rate on first mortgages registered, where mortgagee is a corporation (other than a bank or a building society), or an individual. Mortgages taken by Government Agencies are excluded. Average for year or for 3 months ended month shown.

† Average of daily yields (based on contract price excluding brokerage), for week centred on last Wednesday in each month, for theoretical 2-year and 20-year securities (derived from a freehand curve). Yields relate to securities in respect of which a rebate of income tax equal to 10 per cent of the interest is allowable (i.e. those issued before 1st November, 1968). Compiled by Reserve Bank.

‡ Rate current at end of period.

¶ The minimum period of deposit is 3 months except (since April, 1964) for amounts of \$100,000 or more on deposit for periods of one month but less than 3 months (maximum rates: 4.25 per cent. per annum from 11th March, 1965 until 16th August, 1966, 4.00 per cent. per annum until 27th June, 1968, and 4.25 per cent per annum since then). The maximum period of deposit is 24 months.

§ The maximum amount on which interest is paid is \$10,000 (\$6,000 from July, 1961 to February, 1967).

|| Yield on issue price.

** 12 to 18 months.

†† Over 18 to 24 months.

47. Index of Prices of Shares on Sydney Stock Exchange

Note. This index relates to ordinary shares of the principal companies (excluding banking companies) listed on the Sydney Stock Exchange whose business in New South Wales is extensive. The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per \$2 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 34 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made for changes in capital structure.

53. Export Price Index, Australia

Notes:—

1. The current Export Price Index is compiled as a weighted average of the relative price movements of 29 commodities, the weights being based on the exports (valued at 1959-60 prices) of the commodities in the five years 1956-57 to 1960-61. In these years, the selected commodities accounted for about 83 per cent. of the total value of Australian exports.
2. A comparable series of index numbers has been compiled by linking, at the year 1959-60, the "All Groups" Index in the current and previous Export Price Indexes. The index numbers (Base: 1959-60 = 100) for the years 1954-55 to 1958-59 are 114, 105, 117, 102, and 90 respectively.

54. Wholesale Price (Basic Materials and Foodstuffs) Index

Note. Commodities are priced in their primary or basic form wherever possible. Prices are drawn mainly from Melbourne sources. Apart from locally produced building materials, and one or two minor commodities, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets.

56. Consumer Price Index

Note. The Consumer Price Index is designed to measure quarterly variations in the level of retail prices for goods and services which represent a high proportion of the expenditure of wage-earner households. The index covers a large and representative selection of commodities and services arranged in five major groups—food, clothing and drapery, housing, household supplies and equipment, and a miscellaneous group. Significant changes in consumer expenditure patterns have been reflected in the index by the introduction of additional items and altered weighting patterns.

Base of each Group Index: 1952-53 = 100.0

* Quarterly adjustments for movements in retail prices were discontinued in State awards from June, 1964.

† The minimum wage payable to adult males under certain Commonwealth awards was fixed at \$37.25 from July, 1966, \$38.25 from July, 1967, and \$39.60 from October, 1968.

‡ In addition, an "economic loading" of \$1 per week was payable to all adult males and females under State awards. From 1st January, 1968 this loading was absorbed into the basic wage.

†† From July, 1967, the separate specification of the basic wage, margin, and other elements of award wage rates in Commonwealth awards was discontinued. The total wage (i.e. basic wage plus margin elements) for each award classification for adult males and females was increased from the beginning of the first pay-period commencing on or after 1st July, 1967 by \$1 per week, and by a further \$1.35 from the beginning of the first pay-period commencing on or after 25th October, 1968.

58. Weekly Wage Rates, Adult Employees, N.S.W.

(Weighted Average Minimum Weekly Wage Rates)

Note. The wage rates used in the series embrace a representative range of occupations, and are based on the occupation and industry structures in 1954. The wage rates used are the minimum rates payable—i.e., the lowest rate payable for a particular occupation as prescribed in a representative award, determination, or agreement—for a full week's work, excluding overtime. (The term "minimum wage" has been used by the Commonwealth Conciliation and Arbitration Commission since July, 1966 in a different sense—see Note †, Table 57.) The rural industries are excluded from the scope of the series.

COMMONWEALTH BUREAU OF CENSUS AND STATISTICS
NEW SOUTH WALES OFFICE

PUBLICATIONS

The publications listed below are obtainable from the Deputy Commonwealth Statistician, Bank House, 315 George Street, Sydney. In addition to these publications, the Deputy Commonwealth Statistician issues a number of mimeographed publications, particulars of which may be obtained on application.

The *Official Year Book of New South Wales* presents a comprehensive statistical survey of the social, demographic, and economic structure and growth of the State, and describes the legislative provisions and administrative arrangements which are of significance for a proper interpretation and analysis of the statistics of the State. The Year Book is prepared in Parts (which may bear different numbers from year to year), each of which is issued separately as printed; the Volume is issued when all Parts have appeared.

More detailed statistics relating to matters treated generally in the Year Book are available in the various parts of the *Statistical Register*, and the more recent statistics are available in the *Monthly Summary of Business Statistics* and the quarterly *Statistical Bulletin* and in the mimeographed publications issued by the Bureau. The *Pocket Year Book* contains a wide range of statistical and other material in compact form and is useful as a handy reference book.
